**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 6, 9, 10-13, 15-17, and 19 are rejected under 35 U.S.C. 102(e) as being anticipated by Karau (US 6 520 166).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-5, 7, 8, 14, 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Karau (US 6 520 166). Karau discloses a means for detecting /measuring an ionization signal of at least one combustion event in at least one cylinder of the internal combustion engine during initial engine operation, determining at least one index of combustion quality based upon the ionization signal and, compensating at least one engine control parameter during the initial engine operation

based upon the at least one index of combustion quality (Col. 1, lines 30-40). The differences between the prior art reference and the instant invention are measuring the temperature of the intake valve, timing for the engine crank, adjusting pulse width, as well as using such parasite engine load and the glow plug. It would have been considered to be an obvious choice of mechanical design because one skilled in this art is familiar with basic control mechanic and normally has the laboratory test facilities. To optimize or select the suitable devices/conditions would be within the ability of ordinary skilled in this art.
